

The empowHERed Career Pipeline

By partnering with teams, leagues, and sports organizations, the empowHERed Career Pipeline provides students with job shadowing, internship and job opportunities, invites to exclusive in-person events hosted by partner organizations, plus direct access to industry professionals to grow their network and set up informational interviews.

.....

Pipeline Perks

Jobs & Internships

Our partner organizations (which include roles with/related to the NBA, WNBA, NFL, NWSL, US Soccer, MLB, TOGETHXR, and more), post positions through the pipeline and actively seek out empowHERed members who may be a good fit.

Industry Contact Information

We provide empowHERed Career Pipeline members with direct access to designated individuals within our partner organizations, including HR and department-specific contacts, so that they can grow their networks and schedule informational interviews.

In-Person Events w/ Partner Organizations

Our partner organizations host in-person events, such as Career Days. Depending on the team or organization, events typically include a site tour, plus employee presentations and networking opportunities.

Job Shadowing Opportunities

In addition to jobs and internships, we provide members with critical exposure to the industry through job shadowing opportunities posted by partner organizations and mentors. From shadowing a credentialed reporter at an MLB game to co-hosting a sports podcast, we offer extensive opportunities.

How It Works

- ① Upon purchasing empowHERed Career Pipeline access for your college, students will receive an email with a registration code and instructions on how to create a profile.
- ② After completing registration, students will have access to the Career Pipeline, including the full list of job/internship postings, job shadow opportunities, and industry contacts.
- ③ empowHERed will continually post new opportunities, contacts, and in-person events for members.
